

DEER HUNTER

Lee McClellan— Safety Officer

Last month, one of our HOG members took out a deer with her bike.

Karen and Tom Brunelle had been to Dothan on a ride and were late coming home on 84 near Bainbridge when 3 deer attempted a roadblock for Karen.

Karen hit the middle deer, bending the front fender, engine guard and several other items.

The AMAZING part is that she didn't drop the bike! She attributes that to the fact she has taken some Advanced Riding Courses.

There are several that are taught in this area with some of them even FREE! I have taken some of the courses and would agree that you could learn a lot from them while sharpening your riding skills. There is also an old saying: PRACTICE, PRACTICE, PRACTICE

The more time you spend on your bike, the better rider you will become. I hope no one needs to test their skills like Karen had to do.

Remember, Christmas is coming up and there is some song about Grandma and a Reindeer, so be CAREFUL!

Ride Safe

Lee
